

## Inoculant Made Easy & Profitable

### *N-Force's Added Advantages:*

- Formulated for use with IFST – **240** days on the seed survival
- 18 months of viability once the keg or jugs are opened
- 48 Hours of viability once the product is in its separate inoculant tank, (other brands last 24 hours)
- 2 year dated product on unopened containers
- Special Stabilization Process of the Rhizobia require less extender, resulting in less tacky beans and better flowability
- Comes in a 15 gal ready to use keg (1,920 units per keg) or 2.5 gallon jug
- 2 oz. per cwt., so you can use what you need, not a specified package size of 400, 200 or 50 units bladders
- Less mess, no boxes, no bags, no bottles
- Better value than the competitors
- Better bottom line

### *Multiple-Year Third Party Inoculant Study* (43 Locations)
