## NC471 TF

THE LEADER IN BLACKLEG RESISTANCE

**TruFlex™**  
CANOLA

Nuseed is a global leader in canola genetics and trait development. NC471 TF has been developed for North American grower needs and has shown exceptional blackleg resistance. Together with the benefits of TruFlex technology, NC471 TF will provide growers a new level of protection against one of the most detrimental diseases of canola.

**MATURITY: Medium (Nuseed Group 4)**

**HEIGHT: Medium-Tall**

**SEED COLOR: Black**

### DISEASE PACKAGE

**BLACKLEG: Multi-gene Resistant**

**FUSARIUM WILT: Resistant**

### KEY FEATURES

TruFlex™ Canola with Roundup Ready® Technology

Excellent blackleg resistance

High yielding

Harvestability ease

YIELD % OF 45H33 - 14 LOCATIONS

"NC471 TF is a major step forward in Blackleg resistance in North America. Utilizing multiple major resistance genes combined with minor gene genetic tolerance provides superior defence against a wider range of blackleg strains. NC471 TF will be a great toll to protect canola yields from disease."

## SEED TREATMENT

NC471 TF is treated with Prosper EverGol to protect your seed investment against early season disease and insects.

## TruFlex<sup>™</sup> CANOLA

IMPROVED CONTROL  
OF TOUGH WEEDS

The flexibility of the TruFlex canola system will allow for the control of harder-to-kill weeds like Canada thistle and wild buckwheat.

FLEXIBILITY IN SPRAY RATES  
AND TIMING

TruFlex canola will have a wider application window as compared to Roundup Ready<sup>®</sup> canola. If weather or a late flush of weeds delays your spray date, no problem – you will be able to spray up to first flower\* when applying sequential rates of 22 fl oz/ac. The TruFlex canola system also enables flexibility with your Roundup PowerMAX<sup>®</sup> herbicide application rate to help get the job done.

HIGHER YIELD POTENTIAL  
THROUGH GENETICS AND  
CROP SAFETY

New genetics have packed a lot of yield potential into each TruFlex canola seed. New advances in trait technology will help enable better weed control and crop safety compared to Roundup Ready canola. It's a combination that could give you the opportunity to see much more yield potential at harvest time.

\*First flower is when 50% of the plants in the field have no more than one flower.
