

SILO MAXX

Silage & Haylage Inoculant

Legend Seeds is pleased to offer forage treatments provided by Peak Forage Solutions: Silo Maxx and Silo Maxx WS 50T (water soluble version) inoculants for silage, haylage, and high moisture corn. Silo Maxx includes a proprietary combination of beneficial bacteria, enzymes, antioxidants and potassium sorbate.

PRODUCERS WHO UTILIZE SILAGE INOCULANTS HAVE TWO MAIN OBJECTIVES:

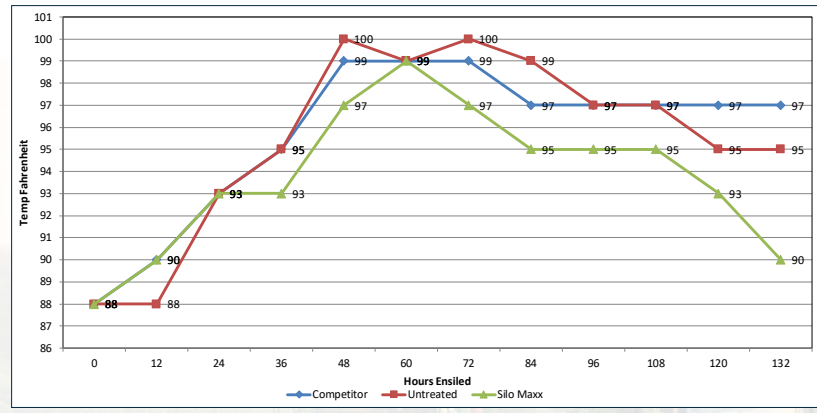

1. Increase the initial rate of fermentation to maximize preservation of feedstuffs
2. Stabilize feed quality during storage and feed out to minimize losses

Silo Maxx accomplishes those tasks efficiently and effectively. If you currently use another inoculant, consider switching to Silo Maxx to maximize the quality of your feedstuffs.

BENEFITS OF SILO MAXX:

- Retains energy
- Retains more nutrients
- Reduces heating, dry matter loss, and seepage
- Improves feed efficiency
- Improves your bottom line
- Reduces leaf loss in alfalfa
- Reduces heat damage in silage, haylage, and dry hay

We cool silage faster!

AVAILABLE AS:

- Conventional or organic
- Dry or water soluble

APPLICATION RATE:

- **Dry:**
 - 0.5 pounds/ton for 60-70% moisture
 - 0.75 pounds/ton for 50-60% moisture
 - 1 pound/ton for high moisture corn (25-35%)

• Water soluble:

- 2-4 grams/ton for 60-70% moisture
- 4-6 grams/ton for 50-60% moisture
- 8-16 grams/ton for cracked or high moisture corn (25-40%)

CONTACT YOUR LEGEND SEEDS REPRESENTATIVE TO PUT THE BENEFITS OF SILO MAXX TO WORK ON YOUR FORAGES TODAY!

"The first difference we noted with Silo Maxx compared to our old inoculant was that the fifty-cent-sized mold spots disappeared. Our old inoculant, a very well-known, national brand was more expensive to use and required higher levels of treatment. However, since switching to Silo Maxx, all our feeds have been consistently preserved."
