

Soyfx™

Soyfx™ is a specific/unique combination of identified and tested microbials that elicit a positive crop response. Soyfx unlocks the plant's ability to produce growth regulators and metabolites that enhance production through biosynthetic pathway efficiencies.

MULTI-CROP USE

✓ **SOYBEANS**

KEY BENEFITS

- More branching per plant
- Increase in flowers and pods
- Increased nodulation
- Reduce plant stress
- Aids in hail damage recovery

IMPACT ON THE PLANT

- **Stress Mitigation**
Specific strains of microbes modulate pH
- **Increased flowers & pods**
Additional branching leads to more flowers and pods
- **Additional Branching**
Specially identified microbes activate the lower axillary buds
- **Increased Nodulation**
Facultative anaerobic bacteria promote and support the production of increased nodulation.
- **Nitrogen Availability**
Converts soil N to plant available forms quicker

APPLICATION

In-Furrow/Foliar 16oz./Acre

- Step 1**
Load water into the application tank
- Step 2**
In-furrow - Load Soyfx into tank
Foliar - Load surfactant
- Step 3**
Load 16oz/acre of Soyfx into mixture

Seed coat 2oz./cwt

- Step 1**
Load into separate tank from fungicide and insecticide (Can be mixed with inoculant)
- Step 2**
Apply 2 oz./cwt of product to the seed
- Step 3**
Plant within 100 days of treatment

MULTI YEAR DATA

Packaging
Seed Coat - 4x1 gal
In-furrow - 4x120 oz.
Foliar - 2x2.5 gal
