

SOYBEANS

Soy$_{fx}$™

Soy$_{fx}$™ is a specific combination of identified and tested microbials that elicit a positive crop response. Soy$_{fx}$ unlocks the plant's ability to produce growth regulators and metabolites that enhance production through biosynthetic pathway efficiencies.

KEY BENEFITS

- More branching per plant
- Increase in flowers and pods
- Increased nodulation
- Reduce plant stress
- Aids in hail damage recovery

APPLICATION

2 OZ/CWT

Seed Coat

Step 1
Load into separate tank from fungicide and insecticide *(Can be mixed with inoculant)*

Step 2
Apply 2 oz/cwt of product to the seed

Step 3
Plant within 100 days of treatment

Check *Treated*

IMPACT ON THE PLANT

- ***Stress Mitigation***
  Specific strains of microbes modulate pH
- ***Increased flowers & pods***
  Additional branching leads to more flowers and pods
- ***Additional Branching***
  Specific identified microbes activate the lower axillary buds
- ***Increased Nodulation***
  Faculative anaerobic bacteria promote and support the production of increased nodulation
- ***Nitrogen Availability***
  Converts soil N to plant available forms quicker

PACKAGING

- Seed Coat - 120 oz
