

# NC527CR TF

**TruFlex**  
CANOLA

## Leading Edge Clubroot Resistance

Utilizing high yielding Nufarm genetics, NC527CR TF now combines the most current multigenic traits for clubroot resistance. A medium-late maturing variety with great harvestability characteristics.

**MATURITY:** Medium-Late

**(Nuseed Group 5)**

**HEIGHT:** Tall

**SEED COLOR:** Black

**DISEASE PACKAGE:**

**Blackleg:** Multi-gene Resistant

**Fusarium Wilt:** Resistant

### Key Features

TruFlex® Canola with  
Roundup Ready® Technology

Multigenic clubroot  
resistance

High yielding

Excellent harvestability

## HYBRID CHARACTERISTICS

## AGRONOMICS

**YIELD:** 100% of check variety 45H33

Hybrid Rating Scale 1=Poor, 9=Excellent

**nufarm**

### Seed Treatment

NC155 TF is treated with Prosper EverGol to protect your seed investment against early season disease and insects.

***“Clubroot is a devastating disease which severely limits yield potential for canola. NC527CR TF will not only allow growers impacted by clubroot to grow competitive crops but will help to minimize the spread across the prairies.”***

CANOLA

#### IMPROVED CONTROL OF TOUGH WEEDS

The flexibility of the TruFlex canola system will allow for the control of harder-to-kill weeds like cleavers, foxtail barley and wild buckwheat. It will also help enable season-long dandelion control.

#### FLEXIBILITY IN SPRAY RATES AND TIMING

TruFlex canola will have a wider application window than our current technology. If weather or a late flush of weeds delays your spray date, no problem – you will be able to spray up to first flower\* when applying sequential rates of 0.67 L/ac. The TruFlex canola system will also enable flexibility with your Roundup WeatherMAX® herbicide application rate to help get the job done.

#### HIGHER YIELD POTENTIAL THROUGH GENETICS AND CROP SAFETY

New genetics have packed a lot of yield potential into each TruFlex canola seed. New advances in trait technology will help enable better weed control and crop safety compared to Roundup Ready canola. It's a combination that could give you the opportunity to see much more yield potential at harvest time.
